EXPERIENCE

Stevens Blueprint

Hoboken, NJ

Vice President of Engineering

April 2026 – Present

- Leading a team of 4 software engineers (expanding to 9+ in Fall) to build and deploy strategic technical projects
- Mentoring junior developers in software engineering best practices, system design, and collaborative version control

Internal Team Software Developer

October 2025 - April 2026

- Programming and automating a RAG pipeline using Python to ingest internal documentation, generate embeddings, and retrieve context for LLM grounding, improving response reliability for 50+ club members

Stevens Software Engineering Organization

Hoboken, NJ

Incoming Club Operations Coordinator

May 2026 – Present

- Will be spearheading planning for workshops and networking events, targeting an average attendee size of 40+ members
- Will develop strategies to streamline internal doc. and membership onboarding to increase active club participation by 30%

Backend Developer

November 2025 – May 2026

- Developing a MongoDB-backed marketplace platform in JavaScript, architecting RESTful APIs and role-based authentication to support up to 300 businesses and 4,000+ students

Hanlon Financial Systems Center

Hoboken, NJ

Research Assistant

May 2025 - Present

- Creating a market simulation in Python populated with reinforcement learning (RL) agents to mimic real stylized facts
- Engineered RL strategies (DQN) in Python in a high-frequency trading environment to maximize returns

Netwoven

Remote

Full-Stack Developer - Internship

June 2025 - August 2025

- Designed and implemented an AI-native Identity and Access Management system using Flask and Azure SQL, integrating automated certification workflows and risk scoring models that reduced manual review time by 80%
-

PROJECTS

DueForge | Founder

Present

- Founded and developed an execution-first SaaS accountability platform under the guidance of the Launchpad@Stevens incubator
- Engineered core platform features allowing users to capture commitments, schedule focused work blocks, and submit verifiable proof of progress to drive consistent output.

ETF-Arbitrage

September 2025

- Developed a Python-based ETF mispricing backtest on 10,000 indexed rows, cleaning messy data and generating long/short signals from stock-basket fair value; achieved 0.85 Sharpe and 299.03% cumulative return.
-

SKILLS

Programming Languages: Python, Java, JavaScript, SQL

Frameworks & Tools: AWS, Vercel, Supabase, GitHub Actions CI/CD

Certifications: AWS Certified Cloud Practitioner, AWS Certified AI Practitioner, AI Agents Fundamentals (Hugging Face)

LEADERSHIP

Stevens Society of AI
